REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)
50277-1841

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 6,105,030, granted August 15, 2000, and for which a

reissue patent is sought on the invention entitled METHOD AND APPARATUS FOR COPYING DATA THAT RESIDES IN A DATABASE

the specification of which is amended as shown in the accompanying preliminary amendment attached hereto and which ☒ is attached hereto.

☐ was filed on _____ as reissue application number _____ / _____ and was amended on _____ (If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

This is a broadening reissue. Claim 11 is too narrow in that it is limited to a specific technique for ensuring that processes access the same state, or "snapshot," of a database. Specifically, Claim 11 is limited to locking the set of data in the database to allow snapshot times to be obtained for the same state of that set of data. However, the invention should not be limited to this specific technique because any number of techniques may be used to ensure that processes access the same state of a particular set of data to implement the invention. For example, as discussed in the specification, a "set transaction read only" command may also be used. Therefore, additional claims, such as Claim 42, are provided that are not limited to the specific technique of Claim 11.
